

INSTALLATION AGREEMENT

Account# _____
Customer Name _____
Customer Add: _____

Date Applied _____
Inst. Date Requested _____

This form is to ensure that the installation process goes as smoothly and cost effective as possible for the customer and Sevier County Propane. Below are the guidelines necessary for us to set the tank when we come out for the first and hopefully only time. We should be able to set the tank, pressure test it and finalize everything on one trip. Please make certain that the following is done:

_____ **All propane effected appliances must be hooked up and plumbed to the outside wall for tank and line to be hooked up. If needs to be converted all appliances must be converted to propane.**

_____ **If trac pipe or gas tight is used it must be grounded to main electrical ground.**

_____ **If electricity is required to operate an appliance electricity must be turned on.**

_____ **Everything must be ready to be turned on when we get there with the tank so that we can hook up the line, regulator and tank and pressure test our part to make sure there are no leaks or problems.**

_____ **We must have access to the inside of the home to finalize the set up and inspection.**

****Please note if we have to come out more than one time there will be a service charge of \$75.00 for each following trip out. Please make sure all of the above is done and we can service your account in a timely fashion.**
